PAT After Minority	(441)	(393)	(217)	(1160)	(491)	88

GMR continues its efforts to stabilize the operations and it is consistently focusing on revenue growth across the sectors. The Gross Revenue for the quarter ended Dec-13 has grown by 9% over the previous quarter and EBITDA has grown by 24%, which is mainly on account of improved performance of Delhi Airport and commissioning of Kamalanga Plant. EBITDA margin has improved to 34% as compared to 30% in the previous quarter.

The loss in the current quarter has marginally increased to Rs. 414 crore mainly due to commissioning of 2nd Unit of EMCO in Sep- 2013 and 2nd unit of Kamalanga in Nov-13. EMCO and Kamalanga plants are in its initial phase of operation and on stabilization the performance is expected to improve in the coming quarters.

As a step forward towards our strategy of Assets Light Assets Right, we have finalised divestment of our stake in Istanbul Sabiha Gokcen International Airport. We are in the process of completing the pre closure activities and we expect closure at the earliest.

In Energy sector, we have successfully commissioned the 2nd unit of 350 MW of Kamalanga plant in Q3. TNEB has invited GPCPL for negotiation for extension of period of power supply and we are in advanced level of discussion with TNEB.

We are in advance stage of closure of divestment of 74% interest in GMR Ulundurpet Expressways Pvt Ltd., which is expected to close very shortly.

As a result of our consistent efforts, we have begun monetization of our Urban Infra assets with signing of Lease deed with Toyota Boshoku India Ltd. at Krishnagiri for setting up of a modern facility to manufacture import substitution product in automobile sector.

Commenting on the performance during the Quarter, Mr. G M Rao, Group Chairman, said:

“The macroeconomic environment in India continues to be challenging. Inflation and consequently high interest rates continue to pose obstacles to growth and profitability. Our Airports and Highways assets are stable; however our results continue to be impacted by the challenges in Energy sector, particularly fuel unavailability and constraints on transmission. We look forward to policy changes to solve these and other issues facing the infrastructure sector.

During the quarter, the second unit of our Odisha power plant achieved COD. Both coal plants are now stabilizing operations.

In line with our strategy, we have signed a definitive agreement for the divestment of the Istanbul Sabiha Gokcen International Airport (ISGIA). We are happy to have been a part of this journey, and to have helped bring the airport to a stage where it has won several international accolades for its service quality and performance, including being called a Super brand.

Our pursuit for sustainable growth continues, and we will be investing in high quality projects. We are the highest bidders in Mactan - Cebu International Airport in the Philippines, and are awaiting the letters of award.

We are happy to note some positive development in infrastructure financing, with progressive steps taken by the RBI. We hope that the reforms momentum is maintained and continue to support the sector in the near future.”

Segment-wise Financials and Highlights for Q3 FY14 and 9M FY14

Airports Segment

Financials:
