The performance in terms of Revenue during the quarter is consistent with the overall operations of the group and includes revenue from the recently commissioned EMCO plant. Increase in EBITDA of 12% in the quarter is mainly due to improved EBITDA margins in the airports sector.

Commenting on the performance during the Quarter, Mr. G M Rao, Group Chairman, said:

“The macro-economic situation is showing signs of improvement. However, sustaining this will need continued focus on reforms and infrastructure development. It is important to debottleneck crucial areas like power generation and highways, without which the targeted growth rate will be challenging. The current thought process of enabling infrastructure financing through policy changes is also welcome. We continue to execute our Asset Light Asset Right Strategy, with the theme of “Develop, Build, Create Value, Divest, and Reinvest” for our portfolio of assets. In the current quarter we divested 74 per cent share in GMR Ulundurpet Expressways Pvt Ltd for Rs. 222 crore. At the same time, we continue to explore opportunities with low capex requirements and quick cash

generation. Our airport operations at Delhi and Hyderabad are stable and both are experiencing healthy passenger growth, especially in international passengers, which is driving non-aero revenue growth. Our Istanbul airport turned PAT positive for the current quarter. On the regulatory side, we have already filed the tariff application for Hyderabad airport.

In our energy portfolio, the lack of gas continues to affect us. This is being offset to some extent as our coal based plants are now stabilizing. Recently, we commissioned the second unit of 300 MW at EMCO, the 350 MW second unit at Kamalanga and the transmission unit at Maru. In addition, we won a 150 MW power supply bid for Tamilnadu. We continue to focus on creating liquidity by meticulous management of our receivables and cash flow.”
